The Tech Source - California State Contractor

License # 849004

Computer Networks

- We can design, Install, Test & Certify data and voice networks up to Gigabit speeds

Telecommunications

- Do phone system choices have you confused? We can help you determine if a PBX is a necessary investment.

Structured Wiring

- We recommend every project: New Construction, Remodel and Tenant Improvement. Include a complete structured wiring plan.

Theater Environments

- Complete home theaters or business conference rooms—Large video wall multi-flat screen displays or projector and screen viewing, give us a budget, we'll build you a theater.

Distributed Audio/Video

- One of the newer categories in the custom installation industry, distributed audio has always had a place in commercial applications for public address systems and background music.
- From simple multi-switch solutions to distributed HD setups for restaurants and other public functions, we can create the environment you desire.

Home Automation

- When it comes to tying it all together, the design and programming of the control system is what will set your project apart. Anyone can help make it easy to use.

Video Surveillance

- Add cameras and a DVR so you'll always have your eye on things. Always.

Access Control

- You don't need to be a bank to have a reason for access control, we can install HID compatible systems for access to your office, public pool or residence.

Live Events

- Working with local equipment rental warehouses, we provide event setup services. Our skilled technicians are in demand for permanent, as well as temporary wiring of A/V solutions. We're proud of it.

Our projects have ranged from business office, residential, and retail, to location based entertainment.
